Professional Summary

- Full Stack Developer with **9+** months of professional experience working across **Java, Spring Boot, Microservices, Node.js, React.js, Angular, PHP, and WordPress**.
- Hands-on experience building **REST APIs, authentication systems, dashboards, multi-company applications, employee management systems, chat, leave management, notifications, and database-driven applications**.

Work Experience

Mechlar Technology

Apr 2026 – Present

Full Stack Developer

Lucknow

- Developed **Founders Brew**, a startup networking platform using **React.js, Vite, Node.js, Express.js, Prisma, and PostgreSQL**, contributing across frontend, backend, database, authentication, and email workflows.
- Implemented **JWT/session-based authentication, OTP verification, OAuth 2.0, role-based access control**, REST APIs, database models, and responsive React interfaces.
- Built a complete **Employee Management System (EMS)** using custom **WordPress plugin architecture, PHP, MySQL, and custom database tables** with multi-company support.
- Developed HR and employee modules including **employee profiles, company/employee management, leave policies, leave requests, approvals, balances, holidays, calendars, WFH, notifications, chat, documents, payroll, and offer-letter generation**.
- Implemented **role-based authentication, employee invitations, token-based onboarding, company-specific branding, dashboards, and company-isolated data access**.

ProdcomTech Pvt Ltd

Jan 2026 – Mar 2026

Java Full Stack Developer

Jhansi

- Worked on **Bizkarm**, a B2B service management platform built with **Java, Spring Boot Microservices, Spring Security, Hibernate, MySQL, Angular, and TypeScript**.
- Developed, maintained, and debugged REST APIs across **9+ Spring Boot microservices**, including authentication, user management, chat, payments, tasks, and audit functionality.
- Worked with **Spring Cloud, Eureka Service Discovery, API Gateway** and distributed microservice architecture while resolving backend, database, API integration, and Angular UI issues.

Projects

EMS – Employee Management System

2026

- Built a multi-company employee management platform using **WordPress, PHP, MySQL, custom plugins, and custom database tables**.
- Developed **HR and Employee dashboards** with employee profiles, company management, documents, leave management, holidays, calendars, WFH, notifications, chat, payroll, and offer-letter workflows.
- Implemented **role-based access control, invitation tokens, password setup, token authentication, email integration, and company-specific branding**.

Founders Brew – Startup Networking Platform

2026

- Developed full-stack application using **React.js, Vite, Node.js, Express.js, Prisma, and PostgreSQL**.
- Built authentication, dashboards, REST APIs, responsive interfaces, database models, email workflows, and application functionality.
- Currently contributing to **Founders Brew V2** with architectural improvements and new feature development.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, PHP, SQL

Frontend: React.js, Angular, Vite, HTML5, CSS3, Tailwind CSS, Responsive UI

Backend: Spring Boot, Spring MVC, Spring Security, Node.js, Express.js, REST APIs, Microservices, PHP, WordPress

Databases & ORM: MySQL, PostgreSQL, MongoDB, Redis, Prisma, Hibernate, Spring Data JPA, JDBC, \$wpdb

Cloud, Security & Tools: Spring Cloud, Eureka, API Gateway, JWT, OAuth 2.0, OTP, RBAC, Git, GitHub, Docker, Maven, Postman, IntelliJ IDEA, VS Code

Education

G.C.R.G. Group of Institutions

2021 – 2025

B.Tech in Computer Science & Engineering

SGPA: 8.3
